

KUDELSKI GROUP : A WORLD LEADER IN DIGITAL SECURITY

The Kudelski Group is a world leader in digital security and convergent media solutions for the delivery of digital and interactive content. Its technologies are used in a wide range of services and applications requiring access control and rights management to secure the revenue of content owners and service providers for digital television and interactive applications across broadcast, broadband and mobile delivery networks.

The Kudelski Group is also a world technology leader in the area of physical access control of people or vehicles to sites and events. And finally, the Group offers a line of professional audio recorders and high-end hi-fi products.

The Kudelski Group was founded in 1951 and is headquartered in Cheseaux-sur-Lausanne, Switzerland. It employs over 2,600 people and operates on five continents.

Kudelski SA is listed on the SWX Swiss Exchange, symbol KUD.VX.

Digital Television

The transition of the television industry from analog to digital as well as the convergence of previously unconnected sectors such as television, telephony and the internet are creating new market opportunities for operators while offering consumers more options for viewing content and interacting with it. In this context, content security and the protection of the revenues of content owners and operators is an increasingly critical issue.

Based on state-of-the-art conditional access and encryption technologies, the Kudelski Group's comprehensive suite of cross-network and cross-device solutions allows service providers to securely deploy a multitude of services including subscription and on-demand services such as TV programs, video-on-demand (VOD), digital video recorder (DVR) functionality, push-VOD, season and team tickets, etc.

Kudelski's technologies are used by more than 120 leading digital television operators worldwide securing content delivered to more than 92 million active smart cards and devices.
